Anthropic API Cost Estimate - Hybrid model

Generated 2026-06-15 - 200 prospects/month - Sonnet 4.6 + Haiku 4.5

Assumptions

- Volume: 200 prospects per month, worked on weekdays only (~22 working days = ~9 prospects/day).
- HYBRID model: Haiku 4.5 ($1 / $5 per 1M) for LinkedIn parsing + company research; Sonnet 4.6 ($3 / $15 per 1M) for the intelligence profile + all message generation.
- 3 message variations per engine. Company research uses 1 web search; LinkedIn parse reads more of the profile.
- Estimates from prompt sizes + typical output lengths; prompt caching (~5-10% input saving) is NOT applied, so figures are conservative.
- Each engine runs on demand - you only pay for the ones opened. Hybrid only differs from all-Sonnet when parsing/research run (those move to Haiku).

Per-prospect breakdown (Full + research, hybrid pricing)

Call (model)	Input	Output	Cost
AI Analysis	1,650	800	$0.017
Connection (3 drafts)	2,550	360	$0.013
Relationship (3 drafts)	2,650	540	$0.016
Meeting, 1 length (3)	2,750	780	$0.020
Follow-up (5 steps)	2,800	1,400	$0.029
LinkedIn parse [Haiku]	6,000	2,000	$0.016
Company research [Haiku]	5,500	450	$0.008
Total per prospect	**23,900**	**6,330**	**$0.119**

Monthly cost for 200 prospects - by model strategy

Scenario	All Sonnet	Hybrid	All Haiku
Light	$9.21	$9.21	$3.07
Typical	**$19.08**	**$19.08**	**$6.36**
Full + research	$33.33	$23.83	$11.11

Light: Analysis + connection + relationship only
Typical: Analysis + connection + relationship + 1 meeting + follow-up
Full + research: Typical + LinkedIn paste parse + web-search company research

Hybrid cost for 200 prospects/month:

Typical: $19.08/mo ($228.96/yr)

Full + research: $23.83/mo ($285.96/yr)

Note: for Typical/Light, Hybrid equals All-Sonnet because no parsing/research runs - there is nothing to offload to Haiku. The hybrid saving shows up on research-heavy prospects, while keeping outreach-copy quality on Sonnet.

Estimate only. The app records exact per-call token usage to the usage table; query GET /api/usage after real runs for actuals.
